

Final Project
CE 222 - Fall 2022
12/13/2022
Lincoln Scheer and Lucien Verrone

Description

This program converts images to HTML webpages of ASCII characters. Because of the complex nature of images, sometimes we may want to create new designs with a retro appeal. This program accomplishes this.

System Requirements

Unix-Based operating systems are supported. Developed for Ubuntu and MacOS.

How To Use (Type Into Terminal)

1. Build OpenCV

```
cd ImgToASCII
cd vendor
make all
```
2. Build ImgToASCII

```
cd ImgToASCII
cd program
make prorgam
```
3. Run ImgToASCII

```
cd ImgToASCII
cd program
make run
```
4. Follow Command Prompt

```
Image for Processing w/o Path: <IMAGE FILE>
Image Successfully Loaded
Image to Save: <HTML FILE>
```
